

Newsletter Issue 2

Two years of MuSiC4Diabetes - Welcome to issue 2

Another year is coming to an end and the MuSiC4Diabetes consortium has progressed. Thus, now it is time for our yearly project update - right before the festive season.

Enjoy your read and have happy holidays!

The MuSiC4Diabetes Consortium

An interview with Lutz Heinemann

Advisory Board
Member

New SAB Member - Welcome to Lutz Heinemann

We are thrilled to welcome another expert and active member of the diabetes research community to our Scientific Advisory Board. With a clear focus on insulin pharmacology and diabetes technology, the co-founder of Profil Institute for Metabolic Research, part-owner of ProSciento Institute and managing editor of 'Journal of Diabetes Science and Technology' is a perfect fit for MuSiC4Diabetes. We talked about how he became a diabetes researcher, what convinced him to join the SAB and how, in his opinion, diabetes management will change in the upcoming years.

Expert Interviews

On the occasion of World Diabetes Day 2025, we asked experts from the MuSiC4Diabetes consortium about the different features of the device and how work life with diabetes has developed in the last 25 years:

Danaë Delbeke and Peter Devlin of INDIGO explain the sensor and how it can improve and facilitate diabetes management.

INDIGO
interview

Carlos Arteaga and Sebastian Kibler talk about the MEMS pump, its features and how it will ensure the correct dosage of insulin is being given to the patient.

FHG
interview

Dominic Ehrmann and Norbert Hermanns explain how suffering from diabetes impacts professional life and how the MuSiC4Diabetes device can bring about positive effects.

FIDAM
interview

Portfolio Activities

MuSiC4Diabetes in the EIC Healthcare Continuum Portfolio:

MuSiC4Diabetes has actively participated in the portfolio work of the EIC. Read a recap on the meetings and activities performed on the MuSiC4Diabetes news section on our website and the brand-new Healthcare Continuum Portfolio website.
